Professional Summary

Junior AI Automation Engineer with hands-on experience in developing machine learning models, automation workflows, and data processing systems. Skilled in building AI pipelines, computer vision solutions, and APIs for automation, with real-world industry experience through projects with KPN. Strong ability to transform data into intelligent systems that automate decision-making and operational processes.

Education

Universum International College – Bachelor in Computer Science

Oct 2023 – Present

Inholland University of Applied Sciences – Big Data & AI (Erasmus Exchange)

Jan 2025 – Jun 2025

Professional Experience

AI Developer Intern – KPN (Netherlands)

Jan 2025 – Jun 2025

- Developed an AI-based system to automate FTU installation validation

- Applied YOLO and computer vision techniques for image analysis

- Built data pipelines for processing image data and metadata

- Performed feature extraction and model performance optimization

- Contributed to reducing manual inspection processes through automation

Python & Data Science Intern – Tectigon LLC

Feb 2026 – Apr 2026

- Built scripts for automating data processing workflows using Python

- Performed data analysis and transformation (Pandas, NumPy)

- Created automated reports and dashboards using Power BI and Tableau

- Applied machine learning techniques for predictive analysis

IT Instructor (Part-Time) – NdreqiNotat.com
Sep 2024 – Sep 2025

Taught programming fundamentals and logical problem-solving

Supported students with debugging and coding practices

Java & Web Developer Intern – Sharp Group LTD
Oct 2023 – Nov 2023

Developed backend applications using Java

Built web interfaces using HTML, CSS, and JavaScript

Integrated frontend with backend systems and databases

AI & Automation Projects

FTU Validation System (Computer Vision Automation)

AI system for automatic validation of installations using image analysis

Student Dropout Prediction API

Machine learning model (Random Forest) for automated risk classification

Hand Gesture Recognition System

Real-time gesture recognition using SVM and CNN

AI Text Classification Pipeline

NLP pipeline for automated text classification using TF-IDF and Logistic Regression

Technical Skills

AI & Machine Learning:

Machine Learning, YOLO, Computer Vision, NLP, Data Pipelines

Programming:

Python, Java, C#, JavaScript, Node.js

Data & Databases:

PostgreSQL, MySQL, MongoDB

Visualization:

Power BI, Tableau

Tools:

Git, GitHub

Certifications & Training

Python & Data Science – Tectigon Academy (Feb 2026)

(Machine Learning, Data Analysis & Visualization, PostgreSQL, Power BI, Tableau)

Full Stack Bootcamp – Coders' Hub (Sep 2024)

Exploring the Intersection of Digital Technology, Innovation and Entrepreneurship – Universum International College (Mar–Jun 2024)

ERP Business Solutions (SAP) – Synergy (Jan–Apr 2024)

Web Development – ProbitAcademy (Sep 2022)

HTML & CSS – ProbitAcademy (Jun 2022)

Techstitution Programme – Beetroot Academy (Sep–Nov 2022)

Java Advanced & Basic – ROI Academy (Jun–Jul 2023)

C# – Udemy (Jan 2025)

Digital Transformation Master Classes – Women in Tech Kosovo (Feb 2024)

Design Thinking – Thomas More University (Nov 2023)

ASU Certificate of Innovation – Cintana Education (Dec 2023)

Excel 2016 Program – INFORMATIKA (Jul 2019)

Soft Skills

Problem Solving | Critical Thinking | Teamwork | Communication | Time Management | Adaptability

Languages

Albanian – Native

English – Full Professional Proficiency

Dutch – Basic

Turkish – Basic
